

FIBONACCI DESIGNERS OF UNIQUE TERRAZZO TILES

LIKE NO OTHER

Fibonacci: Like No Other

Fibonacci is a proudly family-owned company, trusted by more Australian projects than any other terrazzo tile supplier.

Each design is led by founder Michael Karakolis and crafted in collaboration with specialised international partners, using meticulously sourced and quality-checked materials in a seamless, end-to-end process.

Our terrazzo tiles provide versatile, long-lasting solutions for interior applications. Custom-blended for a perfectly homogenous aesthetic and rich depth of colour, they are designed to integrate into any environment—evolving beautifully with your space while maintaining their original strength and finish.

Recently, we've refined our collection—updating classics, introducing stunning new designs, and continuing to curate a range that reflects the best of contemporary Australian design.

NOT TERRACOTTA

ABSTRAKT

FIBONACCI

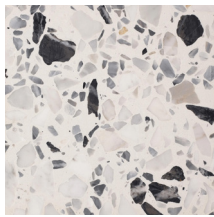

A minimalist interior scene. On the left, a portion of a light-colored wooden bench is visible, showing its thick seat and a single leg. The floor is made of large, rectangular terrazzo tiles with a speckled pattern of grey, white, and brown. The background consists of a wall with vertical, ribbed slats in a dark brown color, and to the right, a smooth wall with a light grey to white gradient. The text "ROAD TRIP" is written in white, uppercase letters on the right side of the image, underlined.

TECH INFO

TERRAZZO TILES MATERIAL + CHARACTERISTICS

It is important to gain an understanding of the material composition and characteristics of the various types of Terrazzo tiles when specifying and prior to installation.

COMPOSITION Fibonacci Terrazzo tiles are produced finished and do not require further polishing following installation. Tiles are manufactured using specialised techniques with the final product consisting of more than 75% natural stone bonded with an inorganic binder (Portland cement) and pigment oxides used for colour. This allows the density to increase, resulting an exceptionally strong but thin profile product with excellent physical mechanical properties. All monolayer

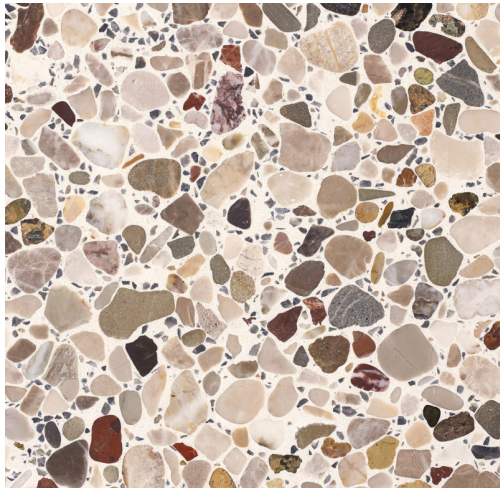

Terrazzo tiles are classified moisture sensitive and the right choice of materials and installation methods is essential to the success of your installation.

AESTHETIC Consistent with all cementitious and natural stone products, tonal variation in the final aesthetic will appear due to the natural materials used. During and immediately following installation, Terrazzo tiles will continue to release small amounts of moisture and will typically show a lighter shade to the perimeter of the tile known as “TV effect”. This is a result of evaporation of moisture and will reduce over time.

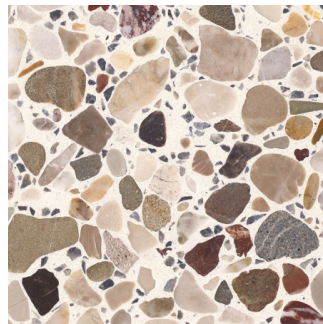

VERSATILE Terrazzo tiles can be polished in-situ to achieve a completely flat floor surface. This is an option sometimes considered for shopping centres and airports where trolleys are being utilised.

Dimensions in mm

600x600x20

400x400x20

MATERIAL Natural stone and cement

NOTE Product variation may occur due to natural material used

CARE Sealing required

EDGING + PROFILES

Fibonacci Terrazzo tiles are completely homogeneous and can be profiled to create edging as required. Use only experienced stonemasons with required tools and methods to achieve the optimal result.

SLIP RESISTANCE

Produced standard in honed finish, Fibonacci Terrazzo Tiles are tested using Wet Pendulum and Wet Barefoot tests and meet the minimum classification requirements for most domestic and commercial applications.

Colour shown above is Freckle. Not all colours available in each size. Please speak to a sales representative for stock availability and prices.

CUSTOMISATION

Creating a space using custom cutting provides an integration of design or a stand out feature. Customisation is a level of detail that exceeds the brief.

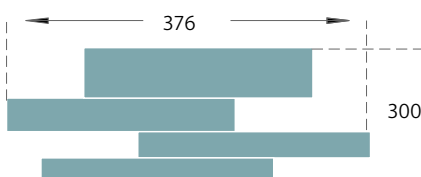

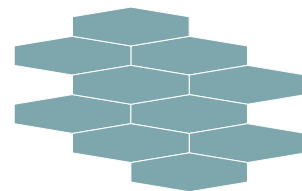

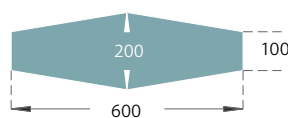

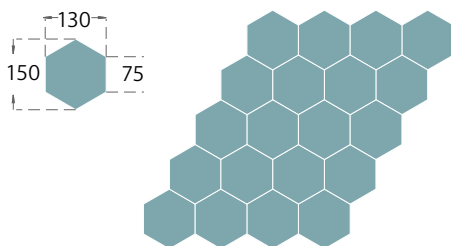

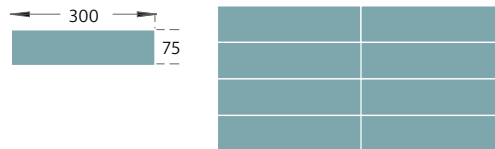

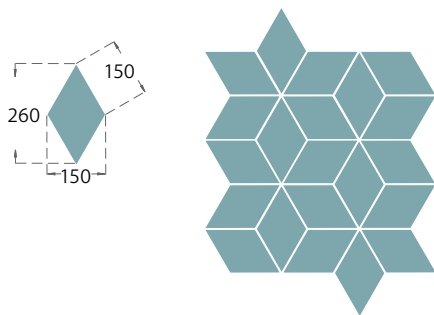

Utilising the latest and highest quality technology, the waterjet has the ability to achieve precision cutting through Fibonacci. This allows design flexibility to create your own specifications.

ANY SHAPE, ANY COLOUR AND CUT LOCALLY.

Crafted for you, the custom cutting experience creates a unique and tailored finish. Contact the AMS Surfaces staff, who can help assist you in your design specifications.
